

For a metal-free pool and spa, get with the program.

Now you can protect your pool and spa from unsightly brown or green stains commonly associated with source waters containing metals like iron and copper. **METALTRAP™** products are unique, patent-pending, water filtration units that selectively filter out stain-causing metals found in water used for filling swimming pools and spas. Unfiltered water can damage finishes, equipment, PVC fittings, and other surfaces.

With METALTRAP, the difference is clear.

METALTRAP™ products utilize new “filtration media materials” that don’t just treat water—they chemically react to physically trap metals, **removing them permanently!**

Our patent-pending technology is specifically designed to remove copper and iron from your water supply (Also effective on manganese, magnesium and arsenic). No matter what your project is or where your water is coming from, **METALTRAP will work hard to get you the best results.**

METALTRAP

What METALTRAP can do for you.

During Plaster Mixing: Make sure you use METALTRAP to pre-filter the water used to mix plaster. **Don't permanently trap in metal stains!**

During Pool/Spa Fills and Top-offs: METALTRAP pre-filters your water. **Unfiltered water can stain your pool or spa finish and damage your equipment and fittings!**

For Existing Pool or Spa Problems: It's never too late with the METALTRAP! **Salvage a stained or damaged pool or spa** by simply re-circulating contaminated water through the METALTRAP and back into your pool using a submersible pump.

Why is everyone hooked on METALTRAP?

- It removes most metals
- It helps de-skunk the sulfur found in well water
- It greatly reduces the chance of staining

Who needs METALTRAP?

- Pool owners
- Spa owners
- Plasterers
- Builders
- Renovators
- Anyone with a well

Your regular filter is NOT enough!

Standard filters on pools today (Sand, DE or Cartridge) can only filter 3 - 5 microns, the size of one human hair. The METALTRAP filters at a sub-micron level, trapping metals the other filters can't.

Saves time and money!

- Use your own well water for top-offs
- No need to wait on water trucks and tanks

Easy to use!

- Just attach it to your hose, flush and fill!
